

Instructions.

Thank you for taking the time to complete this evaluation! The purpose of this evaluation is to determine the relative “readability” of three syntaxes for specifying ontology axioms: Manchester Syntax, Description Logic, and First Order Predicate Logic Rules. To do so, we are asking you to complete three questionnaires regarding these syntaxes; each questionnaire is keyed to a specific syntax.

To complete this evaluation, please follow these steps.

1. Answer the questions on the “Statistics-before” page.
2. Complete the questionnaire for each syntax.
 - a. You will need a stopwatch (or some item for keeping time).
 - b. Choose one of the questionnaires. Please mark the order in which it is being completed.
 - c. Please mark the time taken to complete the questionnaire.
3. Answer the questions on the “Statistics-after” page.
4. Please return the Statistics and questionnaires to Shimizu.5@wright.edu by 7/6/2018.
